

CrossOver Office™ Server Edition extends the power of CrossOver Office by allowing Solaris® and Linux thin-client users to run all CrossOver Office applications. The thin-client computing model offers superior system management benefits, as well as delivering significant savings in support and acquisition costs. With Server Edition, Unix users can now enjoy easy access to Windows applications, while still retaining the power, flexibility, and economy of Unix.

CrossOver Server Edition

the Best of Windows for Linux

Cost-Effective
Whereas other thin-client solutions typically cost hundreds of dollars per seat, CrossOver Office Server Edition delivers robust functionality at an affordable price point.

Hassle Free

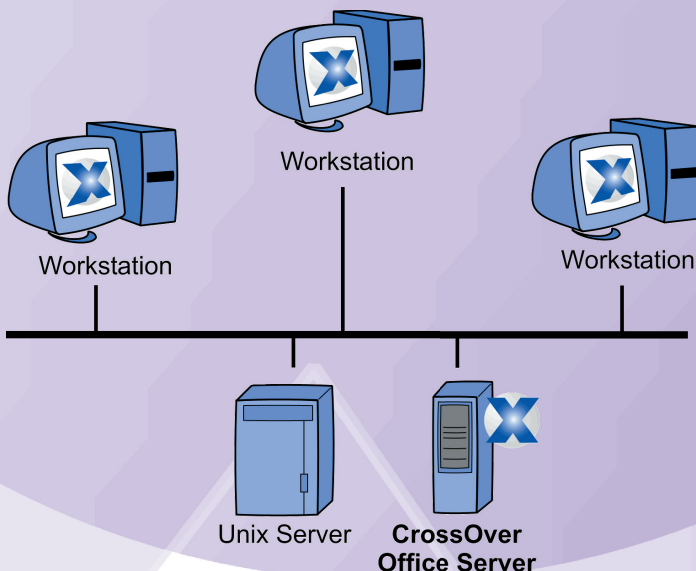

Licensing for Server Edition is painless to administer. A flexible concurrent user scheme does away with the system administration headaches associated with keeping track of which license key is for which user. **No CALS!**

Native Compatibility

Server Edition integrates Windows applications directly into Gnome®, KDE®, and CDE® windowing environments, making Windows applications immediately accessible from either the user's desktop or start menus.

Centralized Management

Server Edition contains many features designed to make system administration simpler, such as centralized package distribution, and usage monitoring.

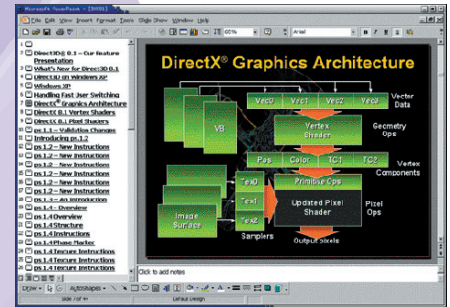

Superior Support

Server Edition is backed up by the highest level of support from CodeWeavers' well-respected support team.

Hosted Applications

Server Edition is capable of running a wide range of Windows software. Officially supported packages include:

- Microsoft Office XP
 - Microsoft Word®
 - Microsoft Excel®
 - Microsoft Powerpoint®
- Microsoft Office 97 and 2000
 - Microsoft Word®
 - Microsoft Excel®
 - Microsoft Powerpoint®
 - Microsoft Outlook®
 - Microsoft Internet Explorer®
- Adobe Photoshop® (7.0 or earlier)
- Microsoft Access®
- Microsoft Visio®
- Lotus Notes®
- Quicken®
- Unofficial support for many other popular software packages

Windows applications now run in thin-client mode under Unix!

Server Edition System Requirements

Server

- x86 compatible PC system, 500Mhz or higher
- Linux x86 distribution (tested on Red Hat, SuSE, Mandrake, Debian, Xandros)
- Glibc 2.1 or greater
- XFree86 4.2 or greater recommended
- 4MB of RAM *plus* RAM required by application, per user
- 50MB disc space *plus* storage required by applications
- 10/100MB Ethernet recommended

Client

- Linux or Solaris operating system
- Other Unix support available upon request
- Windows and Macintosh support to be announced shortly

**Server Edition is certified
for Tarantella, too!**
